## DETAILED ACTION

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-58 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-108 of U.S. Patent No. 6,406,292. Although the conflicting claims are not identical, they are not patentably distinct from each other because to not generate a computer representation of the masticatory system is an obvious matter of choice in not using a step to one of ordinary skill in the art.

Claims 1-58 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 5,975,893 in view of Andreiko et al (5683243). The claims of the '893 patent do not show using a computer to determine occlusion. Andreiko teaches using a computer to determine occlusion, column 27, lines 6-26, and column 44, lines 46-61. It would be obvious to one of ordinary skill in the art to modify the '893 claims to include using a

computer to determine occlusion as shown by Andreiko in order to better move the patient's teeth.

***Drawings***

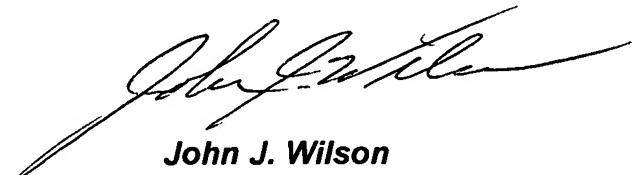

The drawing filed January 14, 2002 are found to be acceptable by the examiner.

***Allowable Subject Matter***

Claims 1-58 stand rejected under double patenting only.
